Partnership for Open Distance and Flexible Learning in the Pacific

COUNTRY BRIEFING: KIRIBATI 2023–2024

The Partnership for Open Distance and Flexible Learning in the Pacific is a five-year project (2020–25) funded by the Ministry of Foreign Affairs & Trade (MFAT), New Zealand, to support enhancing capacity and efficiency of education sectors in the Pacific through greater use of innovative delivery mechanisms and technology. COL, together with the Pacific Centre for Flexible and Open Learning for Development (PACFOLD), is implementing the project in the nine Commonwealth countries in the Pacific (Fiji, Kiribati, Nauru, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu and Vanuatu). PACFOLD is the regional centre of COL hosted by the University of the South Pacific (USP) on the main campus in Suva, Fiji.

Completing its fourth year, the Pacific Partnership project has made significant progress in several key areas: developing capacities of teachers, providing skills training for youth, building the capacities of ministry officials in Open and Distance Flexible Learning, and improving data resilience in ministries of education. Additionally, the project has been involved in reviewing policy documents on educational data management and enhancing disaster recovery plans. This broad scope aligns with the project's holistic approach to meet the diverse educational and training needs of the region, emphasising resilience.

Building capacity of teachers and officials in ODFL

As of December 2024, eight courses have been offered to teachers that covered practical skills for successful Open Distance and Flexible Learning (ODFL) delivery. In total, 567 teachers from Kiribati were trained to offer effective learner support in ODFL contexts. AI-based learner support was deployed to a recent course that enhanced mentoring support, as evidenced by the positive feedback from over half of the learners.

Bi-weekly meetings with the nominated ministry officials were organised to train them on customising open courses, where an official from Kiribati received training on remixing a course called 'Digital Skills for OER sharing' for the Kiribati Teachers College.

HIGHLIGHTS

- 567 Kiribati teachers trained in online and distance learning
- Building the capacity of TVET practitioners through national coordinators
- Fostering data resilience in education through capacity building of officials
- Agreement with the Ministry of Youth Affairs and Sports for capacity building of youth
- New edition of the Pacific TVET toolkit is available at: <https://pacifictoolkit.col.org/>

In November 2023, an online webinar for ministry officials on supporting engagement with OER was organised, where four representatives from Kiribati attended the workshop - see the [video](#).

Moreover, in March 2024, the Micro-credentials Regional Workshop was hosted in USP (Suva, Fiji). This regional workshop focused on the intricate and evolving world of micro-credentials, gathering various stakeholders from nine countries, to deepen

their understanding and strategise on effective implementation across different educational and institutional levels.

Building the capacity of TVET practitioners through national coordinators

The successful Regional Workshop on TVET Online Toolkit took place in Lautoka, Fiji, from 31 October to 2 November 2023. This gathering brought together 14 key stakeholders in TVET from the region, including three representatives from Kiribati.

Over the course of the three-day workshop, participants engaged in discussions focused on formulating strategies for the professional development of TVET practitioners within the region, utilising the [TVET Online Toolkit](#).

As the workshop concluded, participants expressed their enthusiasm for establishing a community of practice to convene and discuss the development of TVET practitioners in the context of implementing the Toolkit across the region. They also affirmed their commitment to serving as coordinators and champions of the Toolkit in their respective countries. To read more, click [here](#).

The in-country coordinator in Kiribati was appointed in February 2024 to promote and facilitate the practical use of the TVET Online Toolkit while enhancing its reach and impact across the region.

From 2–5 September 2024, COL and PACFOLD/USP organised a regional workshop in Laucala, Fiji. The workshop aimed to bring together TVET stakeholders to develop a framework for credentialing micro-learning for the continuous professional development (CPD) of TVET practitioners. The credentialing would be based on resources from the TVET Online Toolkit, with the goal of enhancing the quality of training practices. Participants included representatives from ministries responsible for TVET, the Educational Quality and Assessment Programme (EQAP), National Qualification Framework Authorities, TVET educators, and industry trainers. A total of 22 stakeholders from across the region attended the workshop, including two from Kiribati.

In October 2024, a regional workshop in Fiji brought together 40 STEM educators from seven Pacific countries—Fiji, Kiribati, Samoa, Tonga, Papua New Guinea, Solomon Islands and Vanuatu. This workshop introduced participants to an innovative GPT-powered online service designed to assist educators in generating and refining OER lesson plans. The tool provided a platform for educators to create structured,

contextualised teaching materials, while an integrated online community space enabled collaborative review and feedback. During the workshop, educators produced over 460 lesson plans, with 100 of these being refined and approved for immediate use in classrooms. The deployment of this AI-driven tool complemented traditional training methods, demonstrating its potential to streamline resource development processes while fostering peer collaboration and quality assurance.

These efforts reflect a careful integration of advanced technology and regional cooperation to address the critical challenge of improving the quality of teaching in STEM. By leveraging AI tools within a supportive, community-driven framework, the project has showcased a scalable approach to strengthening STEM education in the Pacific.

A three-day regional workshop on Women, Skills, and Resilient Livelihoods in the Small States of the Pacific was held in Nadi, Fiji from 5–7 November 2024. This workshop gathered 21 NGO representatives from nine Pacific countries, including two from Kiribati, to strengthen the capacities of both government and NGOs concerning the conceptualisation and execution of training using open and distance learning related to various aspects such as human rights, financial literacy, e-commerce and leadership. The workshop also introduced the participants to certain design and creative thinking concepts.

Fostering data resilience of the education system

From 29 April to 2 May 2024, COL organised a Data Resilience Workshop for IT officers from the Ministries of Education, hosted by PACFOLD, in the USP campus in Suva, Fiji. Six IT officers from Fiji, Vanuatu, Kiribati and Tuvalu participated in the workshop, which combined theoretical insights into data management with hands-on training, including a demonstration of the innovative “Cloudlets” solution. The workshop received positive feedback for its content and delivery, highlighting COL’s ongoing efforts to strengthen technical capacities across the region and support the integration of cloud-based solutions and infrastructure in local ministries.

Skills and leadership training for youth, young women and persons with disabilities

The Ministry of Women, Youth, Sport, and Social Affairs in Kiribati, in partnership with COL, launched a project to address youth unemployment by offering accessible vocational and educational training. The project focused on gender equality, linking participants to the labour market and financial institutions, and provided five courses through local institutions like the Kiribati Institute of Technology (KIT) and the Marine Training Centre (MTC). A total of 147 unemployed youth, primarily aged 18-25 and with notable female participation, took part in courses such as sewing, computing, cookery, English, and domestic wiring. From December 2024 to March 2025, six new courses, including welding and auto maintenance, will be introduced, with improvements to course materials and logistics.

Mid-term Evaluation: Partnership for ODFL in the Pacific

The mid-term evaluation of the project was carried out in 2023 to examine the initial two years of the five-year activity. The evaluation provided a summative and formative assessment of the efficiency, effectiveness, coherence and alignment, relevance, sustainable development outcomes, gender equality and resilience development outcomes. The evaluation involved an extensive review of secondary data and small group or individual interviews with key partners – <http://hdl.handle.net/11599/5410>

Evaluation of Training Outcomes in Vanuatu and Fiji

Over the past two years, the Commonwealth of Learning (COL) has dedicated significant resources to enhance the practical skills of youth in the Pacific small island countries. This initiative, aimed at fostering economic opportunities and reducing unemployment, particularly among young women and youth with disabilities, has engaged over 2,600 participants, providing training in diverse areas such as business management, organic farming, and food processing – <http://hdl.handle.net/11599/5623>

Supporting Learners Studying through ODFL: A Guide for Parents in the Pacific

This guide is designed for parents and guardians of children living in the Pacific who wish to support their children in ODFL. It addresses the adaptive and supplemental support parents should offer their children who are engaging in forms of ODFL, either as part of their in-class learning or in a fully online medium of instruction, whether by choice or in response to school closures or emergency circumstances – <http://hdl.handle.net/11599/5507>

Guide to Quality Assurance for ODFL Provision in the Pacific

A guide for teachers and Ministry of Education officials on delivering high-quality distance education in their own contexts. While the expansion of ODFL has significantly increased participation in education, upholding the quality of provision cannot be overemphasised – <http://hdl.handle.net/11599/5443>

Integrating OER in Teaching: A Guide for Teachers in the Pacific

This guide is intended to assist teachers in the Pacific to integrate OER into their teaching. It shows ways in which teachers can use OER in their classroom, as well as supporting remote learners – <http://hdl.handle.net/11599/4014>

ICT Use and Access in the Pacific: Emerging Perspectives

This report studies the use, accessibility, risks and opportunities for ODFL in nine Pacific Island countries (Fiji, Kiribati, Nauru, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu and Vanuatu) – <http://hdl.handle.net/11599/5252>

Improving the Efficacy of Mentorship with an Open Education Ecosystem

This report provides an improved mentorship model for the capacity development courses of the Partnership for Open Distance and Flexible Learning Project. This report highlights the need to nurture a Pacific regional ecosystem to realise sustainable solutions for the future and proposes the establishment of a ‘Collaborative OER Technology Community’ drawing on the success of ‘platform cooperativism’ – <http://hdl.handle.net/11599/4065>

Report of the Special Parallel Session: Strategies and Solutions for ODFL in the Pacific Region

This is a summary of presentations and discussions at a special session on 'Strategies and Solutions for Open Distance and Flexible Learning in the Pacific' organised by COL during the Tenth Pan-Commonwealth Forum on Open Learning (PCF10) in Calgary, Canada, on 15 September 2022 – <http://hdl.handle.net/11599/4534>

Technology in Education

This report is developed in partnership with the Commonwealth of Learning and explores the challenges and opportunities of integrating technology in education across the Pacific, highlighting issues such as limited infrastructure and internet connectivity. Covering 17 countries, the report examines key policy areas of the Pacific Regional Education Framework (PacREF) and offers recommendations tailored to the region's unique context, focusing on quality, learning pathways, student outcomes, and the teaching profession – <https://www.unesco.org/gem-report/en/2024pacific>

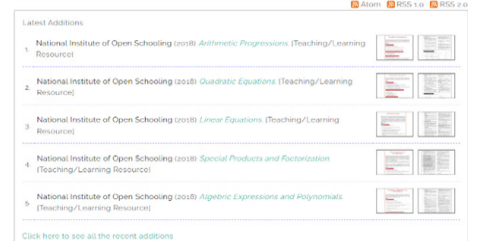

Online learning resources for teachers

The Open and Distance Learning (ODL) Course Catalogue offers a wide range of training courses for teachers in the Pacific on various aspects of ODL. The Catalogue was designed in a way that the Ministries and the educational institutions can have admin access and share any relevant courses for their own country.

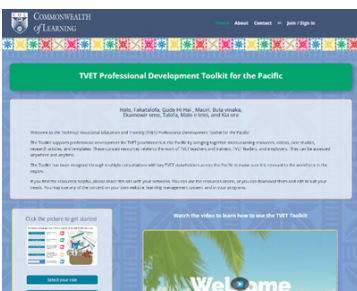

OPEN EDUCATIONAL RESOURCE COLLECTION FOR TEACHERS KIRIBATI

Welcome to Open Educational Resource Collection. This OER Collection provides resources which teachers can use or adapt as they respond to the COVID-19 pandemic, by moving to remote, blended and/or online teaching. This service is designed and maintained by Commonwealth of Learning and DISCOLU with the support of Ministry of Pacific Affairs and Trade, New Zealand.

The Kiribati OER Collection Site has been developed for teachers in Kiribati, which provides access to open educational resources. The site is ready for contextualisation by working with the Ministry of

Education to make it align with the national curriculum.

The TVET Professional Development Toolkit for the Pacific is aimed at enhancing the capabilities of Technical and Vocational Education and Training (TVET) practitioners in Pacific countries. It offers a comprehensive collection of resources, including micro-learning modules, videos, case studies, research articles, and templates, all curated to support the professional development of TVET teachers, trainers, leaders, and employers.

These materials are accessible online and can be downloaded and customised to meet specific needs. Developed through extensive consultations with key TVET stakeholders in the Pacific, the Toolkit ensures its content aligns with the unique challenges and opportunities in the region. Users can engage with the resources in various ways, such as by selecting materials tailored to specific roles, focusing on particular learning areas like training, assessment, or foundational skills, or leveraging tools like the TVET Glossary and Mapping Tool to assess and enhance their competencies.
